RADIESSE® DORSAL HAND REJUVENATION

Youthful Hands, Performed by a Hand Surgeon

A non-surgical, in-office treatment that restores a smoother, fuller, more youthful look to the backs of your hands.

What is Radiesse®?

Radiesse® (calcium hydroxylapatite) is an injectable filler that is FDA-approved to correct volume loss in the back of the hands. It:

- Restores lost volume
- Softens the look of visible veins and tendons
- Stimulates your body's own collagen

Why Choose a Hand Surgeon?

- **Anatomy expertise:** in-depth knowledge of the veins, tendons and nerves of the hand
- **Cannula technique:** a blunt-tip cannula is used to help reduce bruising
- **Personal care:** consultation and treatment by Dr. Yang himself

The Treatment

- **About 30 minutes** in our office
- **Local numbing** for comfort
- **Results visible** right away
- **Little to no downtime**
- **Long-lasting:** results commonly last about a year or longer (individual results vary)

Possible Side Effects

Temporary swelling, bruising, redness, tenderness, itching, or lumps may occur. Rare risks will be discussed at your consultation.

Not for patients who are pregnant or breastfeeding, or who have certain allergies or bleeding issues — please ask the doctor.

PRICING

$950

per syringe

Most patients need **1 syringe per hand.**

Both hands: about **$1,900**

✓ Self-pay cosmetic treatment — not covered by insurance

✓ Payment is due at the time of service
